

CAMPUS CLASH 2D: WEBNEXUS EDITION

Official Game & Event Showcase Draft | SRM KTR & WebNexus

HTML5 Canvas 2D | Web Audio API | 60 FPS Procedural | Zero External Assets

1. INTRODUCTION ABOUT THE GAME

Campus Clash 2D: WebNexus Edition is an arcade-style, competitive 2D fighting game designed specifically for college tech fests, hackathons, and esports arenas. Built with 100% pure HTML5 Canvas and the Web Audio API, the game runs at a smooth 60 FPS directly inside any web browser without needing any installations, downloads, or external image/audio files.

The game blends relatable college student archetypes (Toppers, Backbenchers, Hostellers, Placement Warriors, Tech Hackers, etc.) with real-world emerging technology tracks (Cloud Computing, Cyber Security, Internet of Things, and Edge Computing). Players duel across iconic SRM KTR campus landmarks and futuristic WebNexus tech arenas, collecting real-time falling "Nexus Modifiers" (Tech Pods) that turn real-world tech concepts into exciting combat advantages.

2. OBJECTIVES

- * **Gamifying Core Tech Domains:** Introduce students to fundamental tech concepts (Cloud system recovery, 4096-bit SSL encryption, IoT wireless telemetry, and Edge computing zero-latency overclocking) through real-time gameplay mechanics.
- * **Competitive College Esports:** Deliver a tournament-grade 2D fighting experience featuring combo scaling, counter-hit priorities, super-armor parries, and distinct visual/audio signatures for all characters.
- * **100% Lightweight & Zero Dependencies:** Completely asset-free procedural architecture--loads instantly on any laptop, projector, or mobile device with zero lag.
- * **Campus Culture Representation:** Celebrate SRM KTR student culture, campus landmarks, and hackathon spirit in a fun, gamified format.

3. EVENT DESCRIPTION

At the WebNexus Tech Fest / Hackathon, Campus Clash 2D serves as the central interactive showcase and esports event:

- * **Cloud Computing - The Cloud Citadel:** Server blade racks, pulsating LED arrays, Kubernetes pod clusters, and real-time CPU/memory load tickers.
- * **Cyber Security - Cyber Fortress Zero-Day:** Dark matrix command hub, green binary rain waterfalls, honeycomb firewall barrier, and a live SEC_OPS threat HUD.
- * **Internet of Things - IoT Sensor Matrix:** PCB motherboard with glowing copper traces, ESP32/Raspberry Pi microcontrollers, and 2.4 GHz radio waves.
- * **Edge Computing - Edge Gateway Station:** Decentralized edge node towers, cooling fan exhausts, optical laser channels, and 0.2ms zero-latency status tags.

IN-GAME "NEXUS MODIFIERS" (DYNAMIC TECH DROPS)

- * **Cloud Backup (Cloud):** Restores +25 HP to the player (System Rollback & Data Recovery).
- * **SSL Encryption (CyberSec):** Grants a 5-second 4096-Bit Super Armor Shield (-40% damage taken).
- * **Edge Overclock (Edge):** Grants +35% movement speed and +20 Ultimate Meter (Zero-Latency Mode).
- * **IoT 2.4GHz EMP (IoT):** Drains 25 Ultimate Meter from the opponent and inflicts a glitch stun.

4. HOW WILL IT BE PLAYED PLAYERS SAB INFO

Game Modes: 1v1 Local Versus (two players on one keyboard/gamepad), VS AI Mode (4 bot difficulties: Easy, Medium, Hard, Pro), and Training Dojo (programmable dummy actions and frame data).

CHARACTER ROSTER (10 UNIQUE ARCHETYPES):

Character	Archetype	Combat Trait	Visual / Audio Signature
Aarav (The Topper)	Academic Prodigy	Laser beams & formula projectile bursts	Electric Cyan lasers
Kabir (The Backbencher)	Slacker Heavy	Crush counters & chaotic paper-plane arcs	Crimson shockwaves
Rohan (The Hosteler)	Brawler / Grappler	Kettle steam bursts & blanket-wrap grabs	Amber heat waves
Vikram (The Senior)	Spacing / Zoner	Resume wave traps & placement spacing	Gold aura glints
Priya (Placement Warrior)	Rushdown Flurry	DSA Matrix flurries & offer letter strikes	Matrix code bursts
Arjun (Sports Star)	Aerial Specialist	Football dive kicks & shuttle smashes	Bright Orange trails
Cypher (Tech Hacker)	Disrupter	Binary glitch traps & DDoS shockwaves	CRT scanlines & glitch
Gavel (The Debater)	Counter / Parry	Super-armor objection stances & slams	Royal Blue waves
Bolt (The Sprinter)	Speedster Mixup	Lightning dashes & supersonic rolls	Yellow lightning
Palette (The Designer)	Trap Specialist	Color splash puddles & visual paint traps	RGB blooms & pops

CONTROLS SCHEME:

Action	Player 1 (Left Side)	Player 2 (Right Side)
Movement / Jump / Crouch	W / A / S / D	Arrow Keys: Up / Left / Down / Right
Light / Heavy Attack	J (Light) / K (Heavy)	Numpad 1 (Light) / Numpad 2 (Heavy)
Special Move / Ultimate	L (Special) / Spacebar (Ultimate)	Numpad 3 (Special) / Numpad 0 (Ultimate)
Block Shield / Dodge Roll	I (Block) / U (Dodge)	Numpad 4 (Block) / Numpad 5 (Dodge)

IN-GAME HUD & COMBAT SIMULATION MODEL:

GRAPHIC SHOWCASE MODEL (HIGH-CONTRAST VECTOR ART):
